EDUCATION

Delhi Technological University (Formerly DCE)

Bachelor of Technology in Software Engineering

Delhi, India

Aug. 2018 – May 2022

EXPERIENCE

Software Development Engineer

Nov. 2024 – Present

Juspay

Bengaluru, India

- Spearheaded the on-boarding of Juspay's Hyperswitch product to a new internal service, streamlining deployment, monitoring, and infrastructure management processes, thereby improving operational efficiency and release velocity by 2x
- Drove PCI DSS (Payment Card Industry Data Security Standard) certification renewal for Hyperswitch, collaborating with External and Internal security teams to implement access controls, encryption, and logging standards, ensuring compliance and mitigating risks across all payment-critical systems
- Directed the setup, configuration, and optimization of multiple services on AWS EKS, improving scalability, performance, and security while achieving 40% compute cost reduction and establishing standardized infra patterns for new services
- Designed and implemented Closed User Group (CUG) flows for auth and non-auth users, enabling secure access for thousands of daily transactions, improving routing predictability, and mentoring team members on infra best practices
- Owned complex infra initiatives and ad-hoc platform challenges, including cluster migration, config fixes, environment cleanups, and production debugging, resolving 50+ critical issues and maintaining 99.99% uptime, while defining best practices for cross-team collaboration and platform reliability.

Software Development Engineer

July 2022 – April 2024

Amazon

Hyderabad, India

- Strengthened the security of Internal Authorization and Authentication Website by implementing authorization checks, adding CSRF token validation and establishing guard rails, reducing unauthorized access by 95% and outages by 90%
- Developed a self-service feature on our Frontend website, drastically reducing ticket volumes and saving 80% of SDE hours
- Setup an AWS ECS Service and Integrated ECS with AWS Fargate for server-less container orchestration, simplifying infrastructure management and improving resource utilization using CDK and migrated the control plane APIs of our legacy service for Authentication and Authorization for Internal Services to this new service.
- Decreased service downtime incidents by 90% through the implementation of Canary and Chaos Tests

Software Development Engineer Intern

Jan. 2022 – June 2022

Amazon

Hyderabad, India

- Designed the migration strategy for a dependency service, which was used to store long term credentials and secrets, and move to use IAM Roles for short term credentials and AWS Secret Manager for storing Secrets from multiple Services
- Leveraged AWS CDK to define infrastructure as code (IaC) and automate the deployment of AWS resources like IAM roles/policies, KMS keys, streamlining the development process

PROJECTS

AI-Powered Code Review Assistant | Python, FastAPI, React.js, PostgreSQL, Redis, CodeBERT June 2024 – Dec. 2024

- Built a full-stack platform with Python backend and React.js dashboard to automate code reviews, analyze code patterns, and provide real-time suggestions for best practices, bugs, and security issues
- Integrated AI/ML models (CodeBERT, transformers) and optimized databases (PostgreSQL/Redis), reducing manual review time by 40% and improving code quality by 25%

TECHNICAL SKILLS

Languages: Java, C/C++, Ruby, Rust, JavaScript, Typescript, Lua, Python

Frameworks: Spring, Rails, JUnit, TestNG, Terraform, AWS CDK

Developer Tools: AWS, Git, Docker, Kubernetes, Jenkins, VS Code, IntelliJ, Grafana, Postman, Prometheus

Libraries: jQuery, Hibernate
